## GUIDE TO PRONUNCIATION.

#### ADDITIONS

R.

§ 231 [Add] It in Spanish between two vowels, as in caban (kā-van'), Julia (hoz/vá), soun la like Koriuh s , but it is a bilabial rather than a labiodental, that is, is is formed with the hips alone, and not with the lower hip and upper teeth. It is like the employ we in the middle and south of Germany and of modern Greek & The round is made with a loose, or feeble, contact of the lips Cl § 265

C

\$ 221 [Add ] Cin Car illum Spanish (which is meant by the abbreviation Sp. in the respelling for promine take a) before e and I is pronounced like English the in thin, but in bradith America and in parts of Spain (esp. in Andalusia), it is commonly proposers I like a in sun, although the Castilian sound is often taught in the schools, an arrogata (destrate, by, behirkted, censo (thin'st oredn'st) Cf § 273, below.

#### C 11.

\$27 (Add) On his two scores in German, one, recombing a hawking or electing of the threat, a short aspiration rule with the back of the tongue rules. rivating of the theory, a short, represents to the with the back of the tongue raised in manifer and the act pathed, in heard after a 0, 10, and represented in the respelling for green action by it, as Kachiba this is, the other, found the raiseling of the respect to a few forces in a left further forward in the mount is the raiseling of the tongue being remarked to act the respect to a provider and the hard polate. This letterant discount is not represented for Figure 11 are returned by all as The followed the formula of the countries in a few forces from the first and the following the first in the following the first in the first and the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first in the first interest in the first in the first in the first in the first in the first interest in the first in the first in the first interest in the first interest in the first in the first interest in the first interest in the first interest in the first interest in the first interest in the first interest in the first interest in the first interest in the first interest in the first interest in the first interest in the first interest in the first interest interest in the first interest in the first interest in the first interest in the first interest in the first interest interest in the first interest in the first interest in the first

e a dist warms are resterrotal by taked much though riomes by his, as in kinan

13

but is very weak, some authorities regarding it as nearer the th in thin. In other positions it is more nearly like English d, but the contact of the tongue is further down on the upper teeth, or often touching their edies, and is not so firm as in English 1) is often dropped, or pronounced very faintly, both in Sprin and in Spanish America, esp in the endings ndo, ido, etc , and when final

G.

§ 231 [ 1dd ] G final in German and in most positions in Dutch sounds like Get min ch (rec§ 227, abovo), as in thillweig (halvig'), limigte (lakvig or lavit) Gin Spanish before e and i le like Spanish j (see § 239, below), as in glin (little) gitano (hê-ta'nā)

#### GH.

\$200 [Add ] Gir in Scotch and Irish words is nearly like German ch (see § 22) above), but in the I rightly pronunciation of these words it is sometimes dropped of pronounced as k or I, as in curr igh (kur'id or kur'idk), bangh (bak or bal).

\$220 [Add] I in Spanish is a strong puttural aspirate somewhat resembled German ch., as in Jornaida (hār na thā), Loja (1571ā) Ste \$ 237, above In the Southwestern U. S. J. (g. before c and i) in Spanish and American Spanish words is nearly atentical with English. In strongly experated, but it is sorretined pro-

nounced with but slight asperation or dropped entirely

\$271. [Add] Xin Spanish is now a small equal to Finglish x (ks), but is exclusionably found for the sound of Spanish for glocation in \$4,200 231, above, as it may fix his artifaction of the contract for the state of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the co eaxt (kaha), exido (1-15/th))

2.

5077 I 1/2 I Z in Castilian Franksh (set ich la meant by the abbestuar on by this impellant for promunistion) before a co, or and at the end of syllables, is a common of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of t the tile is thin, but there is not an action and action and is a constant of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the st

agre is specing at sound to him here had no income levels infine on upon (Caraix)

him chiofly on the ground of etymology and of analogy, from a desire, or the one hand, to make the words correspond, as far as practicable, with their primitive forms, ro as to reveal more clearly their etymological affinities, and on the other to reduca as much as possible the number of anomalies and exceptional cases. Of the words whose orthography had been changed for the former reason, many were restored to their ordinary forms by Dr. Webster himself in the second edition of his work, published in 1841, and others still nore restored in subsequent editions. The alterations of the second class have been received with favor and adopted by a large portion of the writers in the United States, and by some authors also in England
It is to be observed that many of Dr Wolster's deviations from the usage of his

time were not innovations, but restorations of older forms which were once very gon- and -re, that the usu of -ce, as in reces, etc., is but a restoration of the older spell erally employed. The most important points in which his orthography differs from hig, and the same is true of the rub-titution of the termination -ce i for -our.

orthography, especially in the United States. These alterations were proposed by I that of most other modern lexicographers, and in reference to which there is still all ference of mange are angre holors, are state I in the following lest, in which the markers refer to the sections of the Rules for Spelling Cortain Clases of Words from below) where the cases are mentioned particularly. These are, the net doubling the first communat in derivatives of words like lend, worship, etc. (35), doubling the first installment, envolument, etc. (§ 9); doubling this finel letter in such words or f. 1911. innature is encounting and it is a normal with and investigation within a first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of the first state of with the termination -re, but which in this book are spelled with two ordings. -r

# RULES FOR SPELLING CERTAIN CLASSES OF WORDS,

FOUNDED ON THE ORTHOGRAPHY OF DR WERSTER, AS EXHIBITED IN THIS VOLUME

after single vowels, are generally doubled as in staff, cliff, doff, poff, all, bell, hill, toll, null The words clef, if, of, pul, nul, and sol, are the most important exceptions. § 2. The letter s, at the end of a money liable, and standing immediately after a

single rowel, is generally doubled, except when - c g, in o's, spade's, loves, loves, has, is, was, etc - it is used to form the possessive case or plural of a noun, or the third person singular of a verb, as in grass, press, hiss, moss, frues The only im portant exceptions are as, gas, yes, gris, his, this, pus, plus, bus (for omnibus), thus

§ 3 Besides f, l, and s, the only consomnts that are ever doubled at the end of a word are b, d, g, m, n, p, r, l, and s. The following list contains nearly all the words in which these letters are doubled, including some which are spelled more or less with a single consonant namely, cbb, cbb, cbb, odd, odd, odd, add (Min), radd, fagg, egg, bigg (n & 1), snigg, tugg, lamin, scomm, milmin (to inask), inn, onn (Law), inn, fuin, ignn, bunit, sunn (Bot), Lapp, iapp, gnarr, parr, err, birr, shirr, shirr, dorr, mhorr, burr, hurr, murr, purr, brett, frett, but (Naut), milt, pillt, smilt, poll (paper), bull, fire, free, bure, fuer, huze

North - The words lel, nel, and sel are sometimes incorrectly spelled left, nell, and sell, and some other words which should have the final letter single are spelled, by some writers, with it doubled.

4 A consonant standing at the end of a word immediately after a diplithong or double word is rarely doubled. The words ail, prai, haul, door, and maim, are examples The words feoff, enfeoff, guess, spens, hours follows no exception. The word guess is only an apparent exception, as the u does not strictly form a diphthong with the e, but serves merely to render the p hard

§ 5 Monosyllables ending, as pronounced, with the sound of L, and in which a follows the sonel, have usually I added after the c, as in bluck, fleck, click, knock, and buck. The words buc, lac, sec, tac, tale, zinc, ploc, rec, sec, are, mare, ore, tore, disc, and fisc, are exceptions

Words of more than one syllable, ending in -fe or -fac, which formerly ended in L also rords derived from the Latin or Greek, or from other sources, and aimilar to these, or formed in an analogous manner, are now written without the &, as, monae, elegioc, zodiac, cubic, music, public. The word derrick is an exception. Words of more than one syllable, in which c is preceded by other sowels than a ar fa, commonly end in ef. as, orroci, barraci, hommock, hilloci, reddoci. The worde almonac, corac, sondarac, limbec, rebec, rorec, zebec, manioc or mondioc, havoe, are exceptions. Almanac, limbec, rebec, and havoe, however, are sometimes written with k after the c, especially in Pagland, and caree is oftener written careck or carraci.

§ 6. In derivatives formed from words ending in c, by adding a termination begunning with e, 1, or y, the letter I is inserted after the c, in order that the latter may not be inaccurately pronounced like s before the following rowel as, colic, colicly, traffie, traffiel ed, traffiel ing, traffieler, physic, physicked, physicking, zinc, zincked, zinching, zincky Wo find also zinching, zinchie, zinl'y (as from zink), etc., not

conformed to this rule

§ 7. In derivatives formed by adding a termination beginning with a rawel to monosyllables and words accented on the last syllable, when these words end in a zingle consonant (except h and x) preceded by n single vowel, that consonant is doubled as, clan, clon'nish, plan, planned, plon'ning, plan'ner, bag, bag'gage, hol, hol'ter, hol'test, wil, wil'ty, cabal', cobal'ier, abet'led, abet'ling, abet'itor, begin'n begin'ning, begin'ning, begin'ner, infer', inferred', inferring Tho consonant is doubled in these words in order to preserve the short sound of the vowel, as otherwise the latter would be liable to be prononneed long Thus, planned, holtest, and abetted, would naturally be pronounced planed, hotest, and abeted, if the cansonant were not doubled Words of this class, in which the final consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is preceded by qu, followed the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite to the consonant is quite t lowed by a single vowel, form no exception to the rule, since the is performs the office of the consenant w as, squab, squab'bish, squab'by , squat, squat'ting, squat'ter, quil,

The derivatives of the word gas (except gas sing and gos'sy) are written with but one s; is, gas'cous, gase'ty, gas'ty Excellence, as being from the Latin excellent, retains the double l, though one l has been dropped from the termination of excellent. Bes des these, the chief exceptions to the rule are those dornatives in which the Des des tacke, the einer exceptions to the tries are those derivative in many the accent of the primilive is thrown back upon another syllable. as, cabell, cab'alian, cab'alian, prefer, preference; refer' reference, defer, deference But infertable, transfer'able, are common exceptions. It is no exception to this rule that chancellor, and the derivatives of metal and crystal, as metalloid, metallurgy, crystalline, crystalline, and the like, are written with the I doubled, since they are derived respectively. from the Latin cancellorius (through the French), and metaltum, and the Greek spurrallos So also the word tranquillity retains the double l, as being from the Latin cancellorius, the derivatives of pontifical, pontifical, and the like One l is also dropped in a few words

§ 1. The letters f and l, at the end of monosyllables, and attaching immediately | tranquillites, while the Linelish derivatives of tranquil, though often written with two t's, are more properly written with only to c, as tranguilles, tranguilles, and the like

§ 8. When a diphthone, or a digraph is presenting a rewel round, precedes the final consonent of a word, or tile accent of a word earling in a single consonent falls on any other syllable than the last, or when the word ends in two different consenants, the final consonant is not doubled in derivetures formed by the addition of a termination beginning with named as, daub, dauled, dauler, neel, neely, trief, brieffer, brieffer, travail, travailed, travailing; reviel, revieled revieling fravely tracteling, tracteler, profit, profited, act, acted, actor; perform, performer, stard, standing

The final consonant is doubled in the derivatives of a few nords ending to 9 in an rull consonant is goubled in the derivalives of a few north entury in order to divinish the liability to lis being prenouvered like f, before ever, assuming in probability, in the limit of the derivative of kidinap, which properly has a secon lary account on the final siliable, are spelled with ar willout the p doubled, as, I lidinaped or kidinapped, kidinaping or kidinapies, and properly in a second or in the final siliable, are spelled with a willout the p doubled, as, I lidinaped or kidinapped, kidinaping or kidinapies or kidinapies. The word receives is more generally thus written in the United States, with one l; but in England it is written received.

Note - There is a large class of words ending in a ringle consonant, and accepted on some other splittle thru the last, the final consonants of which are, by very many writers and loxier graphers, doubled in their derivatives, nunecessarily and contrarily These nords are chiefly these cuding in I, with also a few of other ter to analogy The following list, the words in which are chiefly verbs, includes the minations most important of these in regard to which usage varies namely, apparel, farel, betel, blat, borel and its compounds, concel, carburet and all similar words ending m urci, earti, carol, channel, chisel, counsel, endgel, dlat, dichetel, dovel, driet, duel, empanel, cramel, equal, franci, gembol, gravel, grovel, hendsel; hichet, in peril, gerel, innel, iduap, label, laurel, level, libel, marshal, marxel, me'ol (cos \$1). medal, model, ponel, parallel, parcel, pencil, peril, pistol, pommel, querrel, racel, recel, reval, rouel, shorel, shrivel, entiel, tassel, tinsel, tra mel, travel, tunnel, ve ratel, real, rictual, worship. Worcester doubles the final letters of all these words, except parallel, in forming derivatives by the addition of terminations beginning with vanels, though he remarks, with respect to those ending in I, that "it belier accords with the analogy of the language" to spell their derivatives with but one I. Smart retains the double comenant in this class of words solely on the ground that using figure 11 but remarks that the terms of the class of words solely on the ground that using favors 11, but remarks that 41 the double p in worshipped, worshipper, etc., the second In travelling, traveller, etc., no quite unnecessary on any other score than to satisfy the projudices of the cyc. Cooley doubles the consenant in a majority of the derivatives of words of this class, but writes a ringle consonant in many, as in those of apparel, barrel, berel, channel, driet, gombol, etc. Stormant in many, as in those or apparel, barrel, berel, channel, driet, gombol, etc. Stormanth doubles the final consonant in tibls class, except in the derivatives of channel, dial, parallel, patal, and in some of those from equal, peril, quarrel, vicital, vership. The Imperiol agrees with Stormanth in respect to derivatives at dial, equal, perallel, peril, pistol, viciual, and most derivatives of worship, doubles the lin derivatives of channel, gives caroling or carolling as a noun, duellist and duellist, enamelar and enamellar, and so er and sit, has quarrellous and quarrellous. Stormanth always and the line but setcing has quarrellous and quarrelous - Blormonth giving only the latter, but both agreeing in quarrelled, quarreller, quarreller, — while the Imperial increases the brevel with trammeler and trammeler, norshipper and trorshiper, quirboled or gambolled, gambolled or gambolled, gent boling or gambolling, etc. The Encyclopedie D choury gives both was s for derivatives of the characteristics. acting as gamoouing, etc. The Lieuclopedie D chanary gives both was 100 using at the soft bias, channel (except channelize), druck, raick, ole.; but marks beteled and beteling as rare, and icorshiper as absolote, generally amits the participles, except in citations; and appears to favor the use of the double l, ate, in most of these derivatives. Perry wrote the derivatives of these words with but one l, according to the product of the consequence of the control of the consequence of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control o to the rule, and the same practice was advocated by Walker Conformity to the regular rule has been advocated also by other eminent scholars, but, for like accommodation of the whole Fuglish speaking public, both of the provalent spellings are usually given in this Dictionary, that with the single consenant basing the first place. See "A List of Wards," after § 36

§ 9 Derivatives formed from words ending in a double consonant, by adding one or more syllables, commonly rotain both consonants as, ebb, ebbing, odd, eddly, stiff, stiffness, fell, fellable, still, stillful, skillfulness; will, willfulness, dull, dullness, full, fullness Bo also the double I is retained in the words installment, the still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still still institution, thrastion, and enrollment (from install, institution). I madernally in order to present a false pronunciation if spelled with one! Many writers and laxleographers, especially in England, omit and In these words, as also in the derivative of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the fall of the atives of shill, will, dull, and full, formed by adding the syllables dy and ness See
